

KOREA-PACIFIC PROGRAM WEBINAR SERIES

Tracking North Korean Missile Programs

Given our inability to deliver in-person programming, the Korea-Pacific Program—directed by Stephan Haggard and Munseob Lee—is turning to a weekly webinar series. We will be looking at a diversity of issues this spring, from Korea’s response to the pandemic, to the LGBTQ community in Korea, to developments on the political front in both North and South Korea. We hope that you will join us.

May 11, 2020 | 12:30 – 1:30 p.m. PDT

New tools have allowed open source researchers to track the development and testing of missiles in ways that only governments might have done just a decade ago. These tools allow tracking locations involved in testing and production, as well as to model the missiles themselves.

Professor **JEFF LEWIS**, of Middlebury Institute of International Studies at Monterey and MIIS’s James Martin Center for Nonproliferation Studies, will talk about the art and science of tracking missile development in North Korea and what that tells us about future trends.

**THIS SERIES HAS RECEIVED GENEROUS
SUPPORT FROM THE KOREA FOUNDATION.**
